

Exhibitor Brochure

POSTPONED TO 1-3 December 2020 Tokyo Ryutsu Center (TRC)

Notice about Transport System Expo 2020

The new coronavirus infection, which had been a concern since the beginning of the year, has developed into a global pandemic, and the Governor of Tokyo again sent a request for voluntary restraint of the event.

As a result, we decided that it would be difficult to hold the Transport System Expo 2020 in May. We sincerely apologize to all of you who have been preparing for the exhibition so far and those who have considered visiting the exhibition.

As announced previously, Transport System Expo 2020 will be rescheduled to December 1-3, 2020 and its venue will be Tokyo Ryutsu Center.

We would appreciate your understanding and continuous support.

Overview

[Concept of the Transportation System EXPO 2020]

"Problem-solving systems for the transportation and logistics industry"

Safe drive, accident prevention, health control of drivers, and staffing shortage are the major issues of transportation and logistics industry. In recent years, accidents in the transportation and logistics industry are often covered in the news.

Supervisors and employers of drivers are obliged to urgently take measures to prevent tragic events instead of shifting the responsibility onto the drivers.

In the context of developing IoT and mechanization, "Transportation System EXPO" will offer information to solve problems of the industry and afford an opportunity to talk business through exhibitions and seminars.

Target Exhibitors:

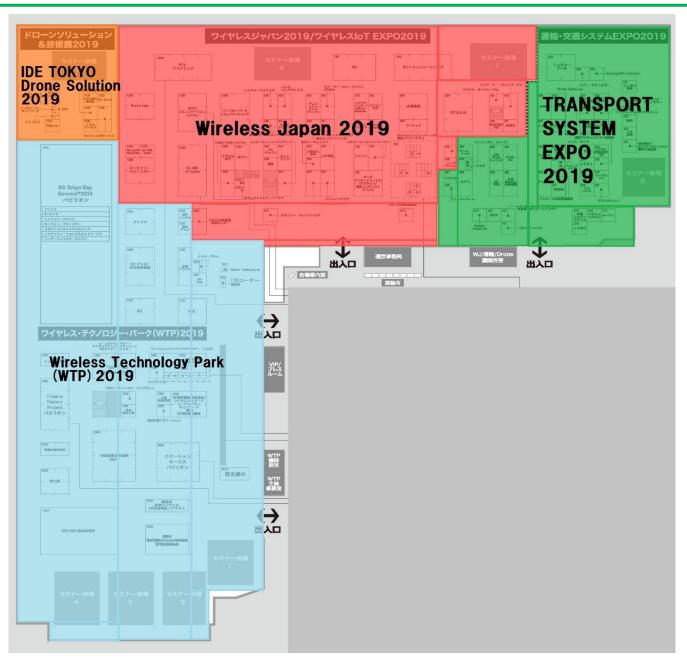

- Safe Drive, Accident Prevention products or solutions supporting safe driving
- [dashboard camera, fatigue measurement system, educational materials for preventing accidents, safe drive training, training application for reducing accidents, etc.]
- Health Control
 products or solutions for monitoring drovers' health or physical condition
 [alcohol checker, air-conditioning clothes, IT call system, air-cooled cushion, call robot, testing device for sleep-disordered breathing, working wear, etc.]
- Improving Operational Efficiency system or solution to improve the operational efficiency of traffic control or drivers
 [digital tachograph, car navigation system, labor management system, delivery management system, movement management system, blood-pressure recording software, etc.]
- Improving Labor Shortage job-search website for the industry [internet job-search service, etc.]

Target visitors:

- Transportation Operator Logistics Operator Logistics Management Department of a Company Automobile Manufacturer
- Automobile Dealer Automobile Equipment or Parts Supplier System Integrator Infrastructure (Road, Railroad)
